Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 October 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Request for Reconsideration

1. This action is in response to the request for reconsideration mailed October 08, 2003. Claims 1-7 are pending.

Claim Rejections – 35 USC § 103(a)

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ito et al (U.S. 5,912,085) in view of Sankey et al. (U.S. 5,800,911) for reasons previously stated in the Office Action submitted on July 16, 2003.

Response to Arguments

4. Arguments to rejection made under 35 USC 103(a) as being unpatentable over Ito et al (U.S. 5,912,085) in view of Sankey et al. (U.S. 5,800,911) have been considered but are found unpersuasive. Applicant indicates the objective of the present invention is to improve delamination resistance of the claimed multilayer structure and argues one of ordinary skill in the art would not modify the layers and composition of Ito based on the disclosure of Sankey because there is no overlap between the required

characteristics of the films of Ito and Sankey or their intended end-uses. Examiner respectfully disagrees with this argument because Applicant is arguing the intended use of the claimed invention versus the intended use of the cited art. In response to applicant's argument that one of ordinary skill in the art would not modify the layers and composition of Ito based on the disclosure of Sankey because there is no overlap between the required characteristics of the films of Ito and Sankey or their intended end-uses, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Ito shows a recording material comprising an opaque polyester substrate (column 3, line 44-52), at least one intermediate layer (cover layer) (column 8, lines 24-31), and at least one ink-receiving layer comprising acrylic and polyester resins (column 5, line 66 to column 7, line 45) where the substrate of Ito lacks copolyesterether. Sankey teaches a polyester first layer (substrate) (column 1, lines 37-43 and column 2, lines 24-30) comprising copolyesterether (column 5, lines 38-67) showing the conventionality of this component in multilayer polyester film substrates. The intended uses of Sankey and Ito of are little consequence because intended use is given little patentable weight.

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
